

EWARRANT STATUS REPORT

BACKGROUND

- A 2013 study revealed that there are well over 100 different arrest warrants templates in use across Arizona. This creates significant training issues during both the entry and execution of arrest warrants.
- In 2015, the AOC established a single warrant format that is to be used across Arizona. Through Training and Technical Assistance sessions funded through NCHIP, the AOC would assist courts in planning for their implementation of this statewide standard.

DEVELOPMENT

- Since August 2019, weekly group meetings have been held among those law enforcement agencies and their court counterparts that are participating in this project.
- Extensive discussions were done on making a cohesive and cross agency warrant template that would be understandable and useable for all agencies involved

Current Status of Project

- AOC has facilitated 21 JAD sessions in 2019 and 45 JAD sessions in 2020 to gather input and finalize documented requirements across jurisdictions for eWarrant.
- A contract project management company has continued to facilitate meetings with Yavapai, Coconino, and Mohave County law enforcement agencies to establish system requirements and routing with the Arizona Department of Public Safety (DPS).
- Eight law enforcement agencies have implemented and are operational on JW1.
- AJACS Courts in Prescott (Muni and Justice), Williams Justice, Flagstaff Justice, and Mohave Superior Court are operational.

2FID STATUS REPORT

Arizona Supreme Court

BACKGROUND

- The two-fingerprint identification (2FID) mobile device electronically validates existence of a defendant's fingerprints in the Automated Fingerprint Identification System (AFIS) and whether an AFIS Record Number (ARN) exists. A positive response indicates to the court that the defendant's fingerprints were taken previously. A negative, "no ARN hit," response informs the court the defendant must be sent for fingerprinting at a booking facility.
- Phase I standardizes the last page on the sentencing order for the fingerprint enabling all AJACSs courts to submit high quality prints to Arizona Dept. of Corrections following sentencing.
- Phase II verifies the person being sentenced is charged correctly and has prints on file for the specific charges being sentenced. (arrest date query to ADRS)

IMPLEMENTATION

The following counties have opted in for 2FID device implementations managed by the AOC: Apache, Cochise, Coconino, Gila, Graham, Greenlee, La Paz, Mohave, Navajo, Pinal, Santa Cruz, Yavapai, Yuma, and Maricopa. However 3 counties are currently not utilizing the devices for Phase I: Coconino, La Paz, Santa Cruz.

PROJECT STATS

- Deployed 173 2FID devices in the Superior Court locations to date and used them for 93,654 individuals at sentencing
- Discovered 923 people were missing 10 prints at the time of sentencing. (They have no criminal history due to no 10 prints on file)

CURRENT STATUS OF PROJECT

- Working with Mohave to start piloting. We did have an error when installing on our test machine however, working with Crossmatch to determine what is happening so we can start utilizing the new application in the courtroom.

HB2673 – Mandatory Minimum Sentences; Judicial Discretion- 2/9 House Caucus and 2/10 House Consent

- Bill has been introduced by Rep. John
